Czech Gas Networks Investments S.a r.l

Czech Gas Networks Investments S.a.r.I's (CGNI) Issuer Default Rating (IDR) is supported by its solid business profile as the largest gas distribution network in the Czech Republic under a fairly supportive regulatory framework. Fitch Ratings expects CGNI will generate positive predividend free cash flow (FCF) on the back of stable operating cash flow generation and moderate capital expenditure (capex) requirements.

In our forecasts, we assume CGNI will manage dividend pay-outs to keep its funds from operations (FFO) net leverage below 6.7x on a sustained basis, which is consistent with the company's public intention to maintain the current rating.

The Rating Watch Positive (RWP) put in place in March 2024 follows CEZ Group signing an agreement to acquire a 55.21% stake in CGNI from Macquarie Asset Management (MIRA). The RWP reflects our expectation that the acquisition by a stronger group will benefit CGNI's ratings due to parent and subsidiary linkage, with the potential upgrade of the IDR if the credit profiles of both entities are unchanged following the transaction's completion.

Fitch will resolve the RWP once the transaction has been completed, which could take more than six months as it is subject to approvals by the European Commission and the Czech Ministry of Industry and Trade.

Key Rating Drivers

Acquisition by a Stronger GRE: Fitch expects CEZ's stronger credit profile to have a positive influence on CGNI's ratings, should the acquisition materialise as expected. We have no information on the legal incentives of CEZ to support CGNI, such as a cross-default provision that could lead to an equalisation of CGNI's rating with the consolidated profile of CEZ.

On a preliminary basis, we see limited operational synergies between the companies, but moderate strategic relevance for CGNI within the CEZ group, given its leading position as a gas distribution system operator, its regulated revenue profile and the expected relevant role of gas and hydrogen in the energy transition in the Czech Republic. CEZ is a government-related entity (GRE) as it is 69.8%-owned by the Czech Republic (AA-/Stable).

Solid Business Profile: CGNI's 'BBB' IDR reflects its solid business profile as a concessionaire (with no expiry) and the operator of the largest gas distribution network in the Czech Republic. It has an 81% market share, followed by Prazska Plynarenská Distribuce and EG.D.

Gas distribution in the Czech Republic is fully regulated and is currently in its fifth regulatory period (RP5), which provides cash flow visibility up to 2025. A well-structured compensation mechanism, including automatic reflection of differences between actual and forecast distribution volumes within two years, provides good cash flow predictability.

We consider the risk of significant regulatory changes affecting the core principles of RP6 starting in 2026 as low, given the Energy Regulatory Office's record of providing a supportive and transparent consultative approach.

Further RP6 Visibility in 4Q24: The process to define RP6 regulatory rules is in progress, with limited visibility on the main parameters changes at this stage. The draft regulation is expected to be available for public consultation in 3Q24, with the final act published in 1Q25. We consider the risk of significant regulatory changes as low, ensuring a stable remuneration scheme.

During the process of determining the regulatory rules for RP6, the discussions will mainly be about the weighted average cost of capital (WACC), opex regulation, compensation for costs arising from new EU/Czech legislation and support for energy transition initiatives.

Capex Update: CGNI's investment strategy for 2024-2028 earmarks a total capex of CZK32 billion (up by CZK4 billion compared with 2023-2027). About CZK28 billion will be directed towards essential regulated capex, with an additional CZK1.4 billion allocated for IT and other regulated investments. Significant growth in regulated capex is projected for 2028, as the company gears up for the hydrogen grid transition.

Unregulated capex accounts for CZK3 billion, primarily focusing on hydrogen production initiatives, and, to a lesser extent, on cogeneration and liquefied natural gas projects. Contribution from non-regulated activities to EBITDA is expected to stay modest up to 2027, at only 1%-3%.

2023 EBITDA Declined; 2024 Recovery: We estimate EBITDA to decline by 18% to CZK7.5 billion in 2023 due to the reimbursement of the cumulative historical k-factor (CZK2.65 billion, one-off event). However, we expect a recovery of about 40% to about CZK10.6 billion in 2024-2025 backed by normalised-allowed revenue levels on steady growth path, positive k-factor collection and operating efficiencies. There is limited visibility for the new regulatory period from 2026. Our forecast assumes annual EBITDA of CZK11.3 billion by 2026-2027, supported by our expectation of a 100bp increase in WACC and higher, although limited, contribution from non-regulated activities.

Leverage Return within Sensitivities: We estimate leverage above the negative rating threshold in 2023 as a result of lower EBITDA and the decision to distribute CZK3.5 billion of dividends (including interest paid on shareholder loans). This amount, which we consider aggressive for the scenario of lower revenue, included deferred payment of dividends postponed previously in 2022 due to uncertainty in gas markets after Russia's invasion of Ukraine. However, we expect leverage metrics for 2024-2027 to remain consistent with the rating.

Coverage metrics are well placed within the guidelines despite higher interest rates due to the large share of fixedrate and hedged debt until 2025 (95%). However, they will deteriorate from 2026 when large debt refinancing starts to take place.

Commitment to Leverage Target: CGNI's management has confirmed its target of maintaining a 'BBB+' bond rating. Following leverage being above the negative rating threshold in 2023, the updated 2024-2028 plan reflects a more conservative capital structure, leaving some headroom to the negative rating threshold of 6.7x versus a dividend-maximisation policy before. A more conservative approach is driven by uncertainties about the outcome of negotiations regarding RP6 and the current high interest-rate environment.

Capital Structure Following Ownership Change: MIRA has agreed the sale of its 55.21% stake to CEZ following the end of the 10-year investment horizon strategy for EUR846.5 million (equity value). The upcoming change in shareholding in addition to the loose covenant debt structure may pose risks to the capital structure in the medium term, despite CGNI's management intention to maintain the current rating. The RWP is based on our assumption of unchanged capital structure and therefore unchanged Standalone Credit Profile (SCP) for CGNI, as result of the company's acquisition.

Key Role of Gas: The Czech gas market has shown stable gas consumption, with yearly fluctuations mostly driven by temperature changes. A carbon-heavy energy mix and a supportive government position towards decarbonisation underpin the positive outlook for gas consumption in the short-to-medium term. There is already evidence of district heating shifting from coal towards gas, expressed in the increase of gas connections and consumption in the distribution area of the company. The transformation is supported with government subsidy programmes from modernisation funds.

Financial Summary

Czech Gas Networks Investments S.a r.l Rating Report | 17 April 2024

Rating Derivation Relative to Peers

CGNI has a solid business profile and a similar debt capacity to that of large European peer E.ON SE (BBB+/Stable), whose rating differential is primarily driven by its more conservative capital structure. We believe the two companies benefit from similarly supportive regulations (Germany and Sweden versus the Czech Republic), while E.ON's large exposure to supply is mitigated by its unique diversification and size.

CGNI's business risk is higher than that of the Italian distribution system operator Italgas S.p.A. (BBB+/Stable) due to better regulatory features in Italy, such as a longer record of fully independent regulation. CGNI's leverage is similar to that forecast for Italgas, and the rating differential is mostly explained by our view of lower business risk at the Italian operator.

We consider CGNI's business profile as more defensive than that of Central and Eastern European peer, SPP - distribucia, a.s. (SPPD; A-/Stable; SCP: a). This is because the Czech regulatory system is well protected from volume risk and less exposed to political risk. However, SPPD's conservative capital structure, with average FFO net leverage of 2.4x forecast in 2023-2027, mostly explains the SCP differential. SPPD's IDR is capped at one notch above the consolidated credit profile of its immediate parent, SPP Infrastructure, a.s., in line with our Parent and Subsidiary Linkage Rating Criteria.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

- Completion of the acquisition and evidence of CEZ preserving a stronger credit profile than CGNI together with a positive assessment of available legal, strategic and operational incentives for CEZ to provide support under our PSL Criteria
- FFO net leverage below 6.0x on a sustained basis

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- FFO net leverage above 6.7x, or FFO interest coverage below 3.5x over a sustained period
- Weakening business risk profile, as a consequence of a less predictable regulatory framework

Liquidity and Debt Structure

Adequate Liquidity: Liquidity is adequate, enhanced by no debt maturities until 2025. As of end-2023, CGNI retains about CZK1.4 billion cash on balance sheet, has undrawn capex of CZK1 billion and a revolving credit facility of CZK500 million. We expect the company to generate positive pre-dividend FCF over our forecast horizon to 2027.

ESG Considerations

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit https://www.fitchratings.com/topics/esg/products#esg-relevance-scores.

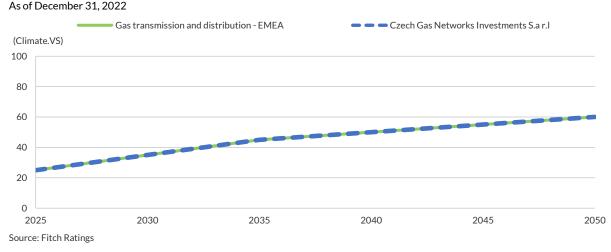

Climate Vulnerability Considerations

Fitch uses Climate Vulnerability Signals (Climate.VS) as a screening tool to identify sectors and Fitch-rated issuers that are potentially most exposed to credit-relevant climate transition risks and, therefore, require additional consideration of these risks in rating reviews. Climate.VS range from 0 (lowest risk) to 100 (highest risk). For more information on Climate.VS, see Fitch's Corporate Rating Criteria.

The 2022 revenue-weighted Climate.VS for CGNI for 2035 is 45 out of 100, suggesting material exposure to climate-related risks in that year. For further information on how Fitch perceives climate-related risks in the utilities sector, see Utilities –Long-Term Climate Vulnerability Signals Update.

This is mitigated by characteristics of the Czech Republic's energy system (reliance on fossil fuels) and constraints of alternative technologies in the country, likely leading to gaseous fuels playing a significant role across all decarbonisation scenarios.

Key Assumptions

Fitch's Key Assumptions Within our Rating Case for the Issuer

- Revenue is based on the current RP5 regulatory principles
- RP5 WACC for 2024 at 6.43%, 2025 at 6.55% due to tax-rate increases. WACC for new RP6 period starting in 2026 assumed at 7.55%
- Annual EBITDA of about CZK10.6 billion for 2024-2025 and about CZK11.3 billion for 2026-2027
- Average capex of CZK5.9 billion in 2024-2027
- Average dividends at about CZK5 billion for 2024-2027

How to Interpret the Forecast Presented

The forecast presented above is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast of the rated issuer. The forecast elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch Ratings' own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out a the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts credited to Fitch Ratings are generated by rating agency staff.

Human Rights, Community Relations, Access & Affordability	3	Product affordability and access	Profitability and Cash Flow; Regulatory Environment	5	
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Quality and safety of products and services; data security	Profitability and Cash Flow	4	F
Labor Relations & Practices	3	Impact of labor negotiations and employee (dis)satisfaction	Profitability and Cash Flow; Financial Structure; Financial Flexibility	3	
Employee Wellbeing	2	Worker safety and accident prevention	Financial Structure; Financial Flexibility	2	
Exposure to Social Impacts	3	Social resistance to major projects that leads to delays and cost increases	Operations; Profitability and Cash Flow	1	

Governance (G) Relevance Scores

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Strategy development and implementation	Management and Corporate Governance
Governance Structure	3	Board independence and effectiveness; ownership concentration	Management and Corporate Governance
Group Structure	3	Complexity, transparency and related-party transactions	Management and Corporate Governance
Financial Transparency	3	Quality and timing of financial disclosure	Management and Corporate Governance

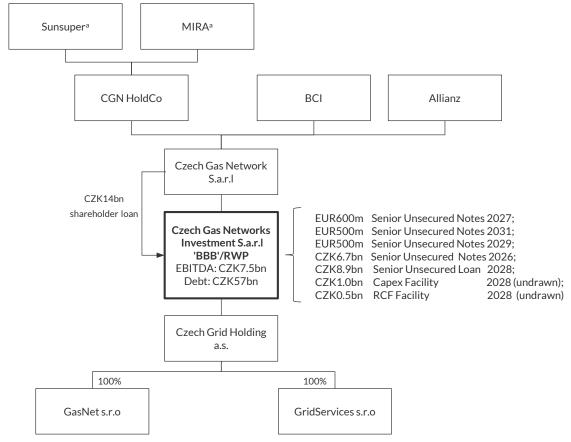

How to Read This Page ESG relevance scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant to the credit rating and green (1) is least relevant. The Environmental (E), Social (5) and Governance (3) tables break out the ESG general issues and the soctor-specific bissues that are most relevant to each industry group. Relevance scores are assigned to each sector-specific issues signaling the credit-relevance of the sector-specific issues to the issuer's overall credit rating. The Criteria Reference column highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis. The vertical color bars are visualizations of the frequency of occurrence of the highest constituent relevance scores. They do not represent an aggregate of the relevance scores or aggregate ESG credit relevance. The Credit-Relevant ESG Derivation table's far right column is a visualization of the frequency of occurrence of the highest ESG relevance scores across the combined E, S and G categories. The three columns to the left of ESG Relevance to Credit Rating summarize rating relevance and impact to credit from ESG issues. The box on the far left identifies any ESG Relevance Sub-factor issues that are drivers or potential drivers of the issuer's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the relevance scores All scores of 4' and 5's are ssumed to reflexe a negative impact unless indicated with a '* sign for positive impact.

All scores of 4 and 5 are assumed to reflect a negative impact unless indicated with a '+ sign for positive impact. **Classification** of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI), the Sustainability Accounting Standards Board (SASB), and the World Bank.

	CREDIT-RELEVANT ESG SCALE						
G Relevance		How relevant are E, S and G iss	How relevant are E, S and G issues to the overall credit rating?

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

For information on the participation status in the rating process of an issuer listed in this report, please refer to the most recent rating action commentary for the relevant issuer, available on the Fitch Ratings website.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: https://www.fitchratings.com/understandingcreditratings. In addition, the following https://www.fitchratings.com/rating-definitions-document details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from of Conduct section of this site. Directors and shareholders' relevant interests the Code are available at https://www.fitchratings.com/site/regulatory. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and its reports, sare responsible for the accuracy of the information free proved to to fitch and to the market in offering or a report will be accurate and complete. Ultimately, the issuer and its reports, finand the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions shout future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$1,500,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$1,000 to US\$1,500,0

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (main subsidiaries are not listed on Form NRSRO) and therefore credit rating subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
